AT&T Port-LockLine

AT&T Port-LockLine

AT&T Port-LockLine connectivity solution is designed to prevent unauthorized or inadvertent changes to cabling networks in highly sensitive applications such as data-centers, enterprise networks including financial, educational, secure IT and military networks, where multiple physical layer access classifications are critical. AT&T Port-LockLine multiple physical layer access classifications is done by color coding.

AT&T Port-LockLine components are available for Category 6 and Category 6A RJ45 shielded and unshielded copper cabling and for SC and LC fiber-optic cabling. When any AT&T Port-LockLine cord or plug is inserted into any jack it automatically locks itself and can only be unplugged with the color-matched extraction tool.

AT&T Port-LockLine

AT&T Port-LockLine product series includes the following copper and fiber optic cabling components:

RJ45 Modular Cords
RJ45 Port Blockers
RJ45 Extraction Keys

SC Simplex Modular Cords
SC Simplex Port Blockers
SC Simplex Extraction Keys

LC Duplex Modular Cords
