

## AT&amp;T Cabling Systems and Ramco in “TechKNOW Days” - Dubai

Dubai, 25 February 2014

Mr. Ashish Marya, AT&T Cabling Systems' Business Development Manager in the Middle-East, held a hands-on presentation on optical fibers & LAN cabling termination at the Higher Colleges of Technology (HCT), Dubai Women's College (DWC).

The presentation was held during the “TechKNOW Days”, and included basic concepts of passive networks and cabling systems. The presentations brought forward the basic code of conducts to follow in termination of cables including the following:

- LAN cable installation & termination
- Cable support systems
- Cable lengths supported in different temperature ranges
- Categories, frequency ranges and data rates of LAN copper cable
- Fiber optic cables

The event was held in collaboration with Ramco Dubai, an AT&T Cabling Systems Certified Installer in UAE.

*RAMCO, is an active member of Issa Holding present in Lebanon, Saudi Arabia, Qatar, Oman and the UAE. RAMCO has highly qualified personnel and more than 15 years of experience as system integrator, providing enterprise IT/IP solutions covering a wide range of industry sectors and businesses.*

*Dubai Women's College (DWC) is part of the Higher Colleges of Technology, one of the three Federal institutes mandated to provide higher education to UAE Nationals. DWC is located in an impressive modern campus that opened in 1989, close to the Dubai International Airport. The campus contains state-of-the-art classrooms, workshops and laboratories, a fully equipped gymnasium, expansive grounds, a career center and a host of learning and activity centers focused towards providing the best possible education for students. DWC has 2,200 students enrolled and it offers Bachelor degrees in five academic areas: Applied Communications, Business, Computer & Information Science, Education, and Health Sciences. An Engineering department will be launched in September 2014.*
