AT&T Cabling Systems CopperLine, FiberLine and RackLine Products approved by Etisalat

10 February 2014

AT&T Cabling Systems FiberLine and RackLine products have been approved by Etisalat for use in FTTH networks.

The products approved from the AT&T FiberLine section include Fiber Optic Cables, pigtails and surface-mount boxes.

The products approved from the AT&T RackLine section include Wall-Mount Network Cabinets.

In addition, AT&T CopperLine products have been approved by Etisalat for deployment in Etisalat projects. AT&T CopperLine includes a full range of horizontal copper cables (solid conductors), flexible cables (stranded conductors), modular cords, consolidation points cables, connectors, patch panels and a variety of plug & play components for data-centers.

Mr. Ashish Marya, Business Development Manager for AT&T Cabling Systems in Dubai said:
"This approval is endorsed by UAE Labs which follows the Telecom Regulatory Authority (TRA) regulations and should enable the use of AT&T Cabling Systems products in other networks in the region".

Etisalat (www.etisalat.ae) is the Middle East's leading telecommunications operator and one of the largest corporations in the six Arab countries of the Gulf Cooperation Council, with a market value of approximately Dh81 billion (US$22 billion) and annual revenues of over Dh32.9 billion (US$9 billion).

A multinational, blue-chip organization, Etisalat has operations in 15 countries in the Middle East, Africa and Asia. Nearly 42,000 people are directly employed by the company.

Etisalat is a pioneer in next-generation networks for both fixed-line and wireless services and it has deployed enough fiber-optic cable in the UAE to reach from the earth to the moon eight times. Etisalat is in the process of launching fourth-generation long-term evolution (4G LTE) networks in the UAE and Saudi Arabia and it currently owns the Middle East's fastest fixed-line broadband network with speeds of up to 30 mega-bits per second (Mbps). As an industry leader in innovation, Etisalat has trialed the world's fastest mobile broadband service with speeds up to 300 Mbps.

Etisalat has over 6.3 million mobile subscribers in the UAE, representing a market penetration in excess of 140%, placing the UAE amongst the most highly penetrated markets in the world. This success can be attributed to the quality and coverage of Etisalat's extensive network, which has made UAE one of the most advanced countries globally in terms of seamless and high quality connectivity.

AT&T Cabling Systems provides complete and state-of-the-art LAN cabling solutions and components for all needs of enterprise customers. Our high-performance network infrastructure solutions based on innovative designs and highly advanced technology are the first choice for all applications. Combining unmatched reliability with the unparalleled AT&T Millennium™ Lifetime warranty, AT&T Cabling Systems is your key to years of fail-safe and trouble-free operation, minimizing system downtime and maximizing your profits.
